

# RED Workplace Health & Safety Assessment

- Risk Identification
- Evaluation
- Documentation

Breach of the Workplace Health & Safety Act 1995 (Q) can have serious financial fines of up to \$375,000 for business as well as criminal consequences for individuals. Our RED modelling service can go a long way to alleviating that risk for your business.

RED modelling is an assessment and advice service which Quinlan Miller & Treston provide to our business and corporate clients. Our seven step procedure includes risk identification, evaluation, training and resource materials to ensure your business is compliant, and has the tools to remain compliant with Workplace Health & Safety requirements.

*When you think Workplace Health & Safety, think RED, think 7 steps, think QMTLAW.*

- 1. Identification of the various workplaces:** Workplace Health & Safety requirements vary depending on the type of workplace.
- 2. Identification of the number of staff and duties involved in each of these workplaces:** risk identification (steps 1 & 2 will enable assessment of what aspects of the Workplace Health & Safety Legislation and Australian Standards are applicable to your workplace).
- 3. A walk through:** to examine workplaces and identify risks.
- 4. Rate the Workplace Health & Safety Risks:** assess the greatest risks for prioritising accident prevention (assessment of cost benefit analysis).
- 5. Prepare a training manual:** Provided to staff at training.
- 6. Prepare a trainers manual:** for training others.
- 7. Prepare induction material and program.**

Our RED assessments are undertaken by Susan Andersen. Susan is an associate at Quinlan Miller & Treston Lawyers and has extensive experience in Workplace Health & Safety and Workers Compensation. For further information on how we can assist you with your Workplace Health & Safety requirements, please contact Christopher Campbell on (07) 3223 6400.
